

Sri Lanka Institute of Information Technology

SE2020- Web and Mobile Technologies
Year 2, Semester 2- 2026

Practical Answer Submission

Practical Sheet No: 01

Student ID	IT24102099
Student Name	Mathuppriya Naguleswaran
Campus/ Center name	SLIIT – Northern UNI
Specialization	Software Engineering
Batch No	1

Develop a web page using HTML

- ❖ **Website** = It is a collection of web pages which are grouped together and usually connected in various ways.
- ❖ **web page** = A web page is a document commonly written in Hypertext Markup Language (HTML) that is accessible through the Internet or other network using an Internet browser.
 - It is accessed by entering a URL address
 - It may contain text, graphics, and hyperlinks to other web pages and files.
- ❖ **HTML** = Hypertext Markup Language
 - it is the most widely used language to write Web Pages.(standard language)
 - It describes the structure of Web pages using markup.
 - HTML elements are the building blocks of HTML pages.
 - HTML elements are represented by tags.
- ❖ **Important Tags.**
 - `<!DOCTYPE html>` :
It should include this tag even before the tag.
It is not an html tag, but tells the browser, the version of HTML page has written.
 - `<html>` :
This tag tells browser that this is the start of an html document.
All the html document contains between ” `<html>`” and ” `</html>`”.
 - `<head>` : Text between ” `<head>` ” and ” `</head>` ” tags are the header information.
These content does not display on the web page.
It usually includes the title of the page,meta information &links to other resources.
 - `<body>` : All the information which are displaying on the webpage include between the `<body>` Tag.
- ❖ `<alt>` attribute in image tag is important because, the alt attribute provides alternative text for an image.it is useful when the image cannot be displayed, and it also improves accessibility for users who use screen readers.

Output of the web page.

Travel Adventures

127.0.0.1:5500/lab1.html

Travel Adventures

Welcome to **Travel Adventures**, your simple guide to planning an *enjoyable and memorable* journey.

[Visit the official website of Sri Lanka Tourism](#)

Packing Essentials

Good preparation helps travellers enjoy a safe and comfortable journey.

1. Clothes
2. Travel Documents
3. Gadgets
 - Laptop
 - Smartphone
4. Toiletries

Trip Cost Overview

Items	Cost (USD)	Notes	Included Items
Flight Ticket	1200	Round trip	• Seat reservation • Airport tax
Hotel	800	7 nights	• Breakfast • Wi-Fi
Food	400	Estimated	• Lunch • Dinner

Traveler Information

Please enter your details:

Name:

Age:

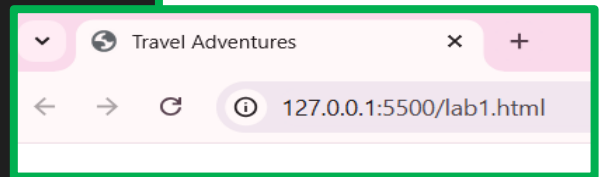

Email:

Student Name : Mathuppriya Naguleswaran

3

1. Add a title : To show a name in browser tab.

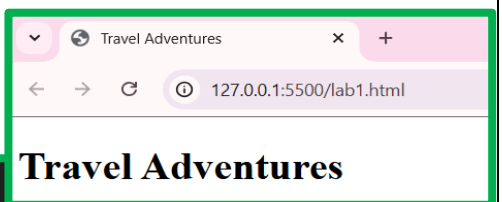

```
lab1.html > html
1  <!DOCTYPE html>
2  <html>
3      <head>
4          <!--a.Add a title-->
5          <title>Travel Adventures</title>
6      </head>
7
```

- The title helps user know what page is open in the browser tab.
- This does not appear inside the page body.
- It appears at the top tab of the browser.

2. Add a Header : To show the website name on the page.

```
8  <body>
9      <!--b.Add a Header-->
10     <h1>Travel Adventures</h1>
11     <p>Welcome to <b> Travel Adventures</b>,your simple guide to planning an <i> enjoyable and memorable</i>journey.</p>
```

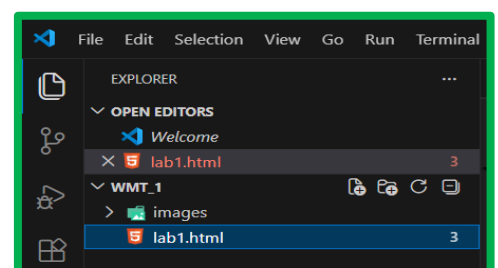

- <h1> is a main heading of the webpage.
- Within <h1> tag the word becomes large & bold.
- <h1>,<h2>,<h3>,<h4>,<h5>,<h6> are headers in HTML.
- Add a suitable header using those tags to display website name.

3. Add an Image : Display the image

```
12     <!--Group image and link together-->
13     <!--This div groups the travel image and the toursim link together-->
14     <div>
15         <!--c.Add an Image-->
16         
17
```

Create images folder & Save image

- img -> image tag
- src -> where the image file is (address of the image)
- alt -> text shown if image does not load (alternative text if image fails to load)
- width="300" -> image width
- height="200" -> image height
- does not need a closing tag.

4. Add a link : To add clickable text.

```
18 <!--d.Add a link-->
19 <p> <a href ="https://www.w3schools.com/html/html_links.asp">Visit the official website of Sri Lanka Tourism</a></p>
20 </div>
```

- Links connect one page to another resource.
- <a> : anchor tag
- <a> this tag creates a hyperlink
- href : the destination address (hyperlink reference)
- The text between opening and closing tags is what users click.
- A link can be placed inside a paragraph.

[Visit the official website of Sri Lanka Tourism](https://www.w3schools.com/html/html_links.asp)

5. Add a horizontal line : To separate sections visually.

```
21
22 <!--e.Add a horizontal line.-->
23 <hr>
24
```

- This creates a simple line between sections.
- Its not used for headings.

6. Create heading, paragraph, ordered list and nested list : To organize content using lists.

```
25 <!--f.Create the below section by adding <h2>, <p>, <ol>, <ul> and <li>-->
26 <h2>Packing Essentials</h2>
27 <p>Good preparation helps travellers enjoy a safe and comfortable journey.</p>
28 <ol>
29   <li>Clothes</li>
30   <li>Travel Documents</li>
31   <li>Gadgets
32     <ul>
33       <li>Laptop</li>
34       <li>Smartphone</li>
35     </ul>
36   </li>
37   <li>Toiletries</li>
38 </ol>
```

Packing Essentials

Good preparation helps travellers enjoy a safe and comfortable journey.

1. Clothes
2. Travel Documents
3. Gadgets
 - Laptop
 - Smartphone
4. Toiletries

7. Add a table

```
40      <!--g.Add a table-->
41      <h2>Trip Cost Overview</h2>
42      <table border="1" cellpadding="8" cellspacing="0">
43          <tr>
44              <th>Items</th>
45              <th>Cost (USD)</th>
46              <th>Notes</th>
47              <th>Included Items</th>
48          </tr>
49          <tr>
50              <td>Flight Ticket</td>
51              <td>1200</td>
52              <td>Round trip</td>
53              <td>
54                  <ul>
55                      <li>Seat reservation</li>
56                      <li>Airport tax</li>
57                  </ul>
58              </td>
59          </tr>
```

```
60          <tr>
61              <td>Hotal</td>
62              <td>800</td>
63              <td>7 nights</td>
64              <td>
65                  <ul>
66                      <li>Breakfast</li>
67                      <li>Wi-Fi</li>
68                  </ul>
69              </td>
70          </tr>
71          <tr>
72              <td>Food</td>
73              <td>400</td>
74              <td>Estimated</td>
75              <td>
76                  <ul>
77                      <li>Lunch</li>
78                      <li>Dinner</li>
79                  </ul>
80              </td>
81          </tr>
82      </table>
```

Trip Cost Overview

Items	Cost (USD)	Notes	Included Items
Flight Ticket	1200	Round trip	• Seat reservation • Airport tax
Hotal	800	7 nights	• Breakfast • Wi-Fi
Food	400	Estimated	• Lunch • Dinner

Tables are used when data must be shown in a structured grid.

Table has 3 columns as Item, Cost (USD), Notes,Included items.

- <table> : starts table
- Border ="1" : adds border
- <tr> : table row
- <th> : table header cell
- <td> : table data cell
- Cellpadding="8" : gives space inside cells
- Cellspacing="0" : removes outer spacing between cells

8. Add a form : collect user details.

```
84      <!--h.Add a form-->
85      <h2>Traveler Information</h2>
86      <p>Please enter your details:</p>
87
88      <form>
89          <label for="name">Name:</label>
90          <input type="text" id="name" name="name">
91          <br><br>
92
93          <label for="age">Age:</label>
94          <input type="number" id="age" name="age">
95          <br><br>
96
97          <label for="email">Email:</label>
98          <input type="email" id="email" name="email">
99          <br><br>
100
101          <input type="submit" value="Submit">
102      </form>
```

Forms allow users to enter data.

<form> : wraps all input fields

<label> : names the fields

<input type="text"> : accepts text

<input type="number"> : accepts numbers

<input type="email"> : accepts email format

<input type="submit"> : creates submit button

**
** : moves content to next line

Traveler Information

Please enter your details:

Name:

Age:

Email:

9. Add a horizontal line.

```
104      <!--i.Add a horizontal line.-->
105      <hr>
```

10. Add a footer

```
107      <!--j.Add a footer-->
108      <footer>
109          <p>Student Name : Mathuppriya Naguleswaran</p>
110      </footer>
111  </body>
112 </html>
```

Usually contains ending information like author name, copyright, contact details.

❖ Common errors and fixes

1. Image not showing: Wrong path or wrong image name

```

```

Here,

Folder name should – images

Image name should – travel.jpg

2. Link not working : wrong href (make sure the url is inside the quotes)

```
<a href ="https://www.w3schools.com/html/html_links.asp">Visit the official website  
of Sri Lanka Tourism</a>
```

3. Table looks broken : Missing <tr>,<td>, or </table>

4. Form fields appear on same line : Use
 tags

5. Browser tab title not changing : you put title inside body, Move into <head>

❖ Full Code of the web page.
